

**REMARKS**

The claims have been amended to correct typographical errors in the specification.

The specification of this application is an English translation of the underlying PCT application which is in Japanese. The change made at page 74 corrects a typing error – the value should be 0.2 instead of 9.2; the change on page 75 inserts omitted HLB information. Both of these changes are supported in the underlying PCT application which was incorporated by reference into the subject application in a Preliminary Amendment (see page 2) filed with the application papers on June 10, 2005. These amendments are made in accordance with the practice set out in MPEP Section 608.01(p)I.B. The MPEP advises that the limitations on the material which may be incorporated by reference do not apply to applications relied on to establish an earlier effective filing date under 35 USC 119. Later in that same section, it is made clear that the policy concerns do not apply "where the sole purpose for which an applicant relies on an earliest U.S. or foreign application is to establish an earlier filing date."

The changes to page 78 are to agree the example numbers with the table that follows on the next page.

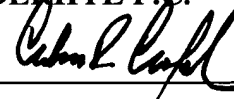

An examination on the merits taking into account the documents cited in the International Search Report is awaited.

**SUZUKI et al.**  
**Serial No. 10/538,755**  
**July 20, 2005**

Respectfully submitted,

**NIXON & VANDERBYE P.C.**
